

NEW PRODUCT ANNOUNCEMENT

WIRELESS PUSH-TO-TALK (PTT)

**Perfect solution
for any vehicle where
a convenient PTT button
is needed to execute voice and
device commands.**

CORE™
control

Ergonomic steering wheel mounted wireless POD houses primary HOTKEY for COREcontrol voice commands and additional HOTKEYS that can be programmed for other COREcontrol vehicle device functions.

Programmable HOTKEYS allow control of any 54ward command in the vehicle by simply pressing HOTKEY on steering wheel or dash mounted pods.

Ability to control such actions as:

- Initiate voice commands
- Select radar modes
- Activate Radar Antennas and Lock Speeds
- Adjust two-way radio channels, zones and volume
- Activate emergency lights and sirens
- Navigate between multiple software products (CAD, RMS, Mapping, etc)

All while keeping both hands on the wheel and eyes on the road.
